## STAR NOTES

Beginning in January 2000, the Bureau of Engraving and Printing plans to sell a single and double pack of \$20 star notes. The single pack will sell for \$35 and the double will sell for \$70. There will be a limited number of star notes offered.

Star Notes were first used in 1910. They were produced in all denominations to replace currency notes that were removed from regular production due to damage, research, or testing.

Star Notes have security features of other notes, but can be distinguish by a star in lieu of a suffix letter at the end of its serial number.
